A

SYNOPSIS OF THE SPECIES

OF THE

CLASS REPTILIA.

BY J. E. GRAY, ESQ. F.G.S., &c. &c.

N.B.—In the following List those species alone are included, which have either been seen* by the author, or which have been well figured or described.

REPTILES.

Vertebrated animals, respiring by lungs, having warm red blood, heart with one ventricle and two auricles and the skin covered with scales.

* In forming this list, the collection of reptiles of the British Museum, the College of Surgeons, and of Mr. Bell, in London, of the Gardens of Plants and Ecole de Medicine at Paris, of the Royal Museum of Leyden and Berlin, and the Free Town of Frankfort, have been studied with attention through the kindness of their several keepers.—J. E. Gray. Oct. 1830.
CLASS REPTILIA.
